## Tamworth Recycling Project! Styrofoam Recycling Drive June 3rd & 4th

The Tamworth Recycling Project is holding a Styrofoam Recycling Drive at the Tamworth Transfer Station on Saturday, June 3rd and Sunday, June 4th, from 9:00am until 1:00pm each day. Please [click here](#) for details - and start saving your foam for recycling! All foam must be CLEAN - and no foam packing peanuts or pipe insulation can be accepted. When all the foam is collected, volunteers will take it to the Gilford Recycle Center, where the foam will be fed into a "densifier" and transformed into compact bricks which can then be made into a variety of products.

We're looking for a few more volunteers to help with collecting the foam at the Transfer Station on June 3rd or 4th. If you can give an hour to help with the drive, contact Ellen at [ellenlynnfarnum@gmail.com](mailto:ellenlynnfarnum@gmail.com) . It's a fun way to connect with neighbors - and help keep this troublesome material out of the waste stream!

## Veteran's Committee - Seeking Volunteers!

The Select Board is seeking volunteers to join the newly formed Veteran’s Committee. The committee has been formed to plan and implement celebrations of our veteran’s on Memorial Day and Veteran’s Day.

The Committee will meet on an as-needed basis. No special skills are necessary other than the desire to work on the behalf of our Veterans. Please reach out to Keats Myer at the Town Offices Admin@Tamworthnh.org

## Transfer Station Study

As part of the Recycling Center Improvement Project for the Town of Tamworth, Sanborn Head & Associates Inc. prepared this transfer station study to support the proposed development of a new transfer station and recycling facility in Tamworth, New Hampshire.

The objectives of this study was to evaluate 1) the traffic flow at the transfer station and 2) monthly solid waste and recyclable data and utilize it to project future traffic flow and solid waste and recyclable materials generation rates, loose storage volumes, and baled storage volumes for development and sizing of the new transfer stations and recycling facility. This report summarizes the processes used to preform this study and the results.
